

Streamline Legal Management

Seamless document management and cost recovery in one solution

Improve Cash Flow

Legal firms need to securely and accurately capture and charge for all print activities. Cilantro integrates PaperCut MF with Practice Management Systems, providing the data required to support a range of client billing models. This powerful integration automates the process of allocating expenses against client matters for efficient invoicing, improving the firm's cash flow. This also removes the need for manual record keeping, connecting the firms key platforms.

Streamlined Workflow

With the volume of paperwork that is generated with client matters, the document workflow needs to be efficient and secure. The Cilantro integration with PaperCut MF allows for paper documents to be scanned from the MFD and automatically attached to the correct client matter within the Practice Management System. PaperCut MF's inbuilt OCR creates intelligent text searchable documents for easy navigation and retrieval of large files.

Client & Matter Creation

Cilantro synchronises new Client or Matter codes created within the Practice Management into PaperCut MF. This allows for easy matter allocation, when printing, copying or scanning, creating a seamless and intuitive user experience. This also streamlines productivity and ensures quality standards are applied as it removes the data security risks for scan to email workflows.

We work with you...

Working in direct consultation with our reseller partners, we've created bespoke integrations to ensure that PaperCut MF and Cilantro can maximise the benefits to a legal environment. Our development team has integrated PaperCut MF with Practice Management Systems including LEAP, Smokeball, Affinity, FilePro, Actionstep, Open Practice, Infinitylaw, PracticePanther, Practice Evolve, streamlining a law firms workflows within one centralised database, maximising productivity whilst ensuring that all fees and charges can be accurately tracked and accounted for.

Our dev team is happy to work alongside resellers to ensure that any Practice Management System can be brought into this responsive and streamlined information ecosystem, allowing any law firm to take full advantage of PaperCut's power.

Products Used

PaperCut's flagship print management software, PaperCut MF is designed with security at its forefront whilst delivering a user friendly print environment that improves both client data integrity and a firm's productivity.

PaperCut Mobility Print is a cutting edge cloud print solution. It empowers users to print from their own devices (BYOD), providing flexibility to staff at the practice, court, client locations as well as working from home.

Taco's in-house connector, Cilantro, provides the key link to integrate PaperCut MF with Practice Management Systems. This connectivity tool, streamlines workflows for users whilst empowering productivity for legal firms.

Third-Party Connectivity Benefits

Law firms work better when systems are responsive and secure. At Taco, our driving vision is creating truly connected environments. By integrating systems, the law firm takes control of disbursements, costs and document management all from one system.

PaperCut Mobility Print makes printing from BYOD devices simple, and adding Cilantro allows this information to be synchronised with Practice Management Systems for automated record keeping. The Cilantro integration simplifies the workflow process for all employees.
