All Systems in One
Bring all library members and payments into one simple, easy to manage place

A Single Digital Wallet

The web of systems in a library can often create confusion, with users required to switch back and forth between accounts to use basic facilities. PaperCut MF and Cilantro give users access to a single digital wallet, meaning they can pay for everything from the same account whether it's printing and copying or library fines. They can even purchase a cup of coffee from the library cafe!

Make transactions simple for customers and administrators alike with this powerful solution.

Easy Printing for Guest Users

It's important that guests are able to interact with the print and copy devices as easily as members. PaperCut offers pay-for-print guest printing that is perfect for library settings.

we also distribute kiosks and terminals that can act as the payment point and has the option to dispense a new card. With PaperCut MF working hand-in-hand with Cilantro integrations and the appropriate hardware, guests can print as simply and quickly as members.

Save Time & Money on Print Deployment

PaperCut MF offers efficient and intuitive print deployment, with fully automated installation to reduce the load on administrators and IT teams.

Automated print deploy means less time and money spent on deployment and maintenance. Compatibility with Windows, macOS, and Chromebooks offers administrators versatility of configuration. Mobility Print allows users to take advantage of BYOD printing, letting them print from their own smartphones and tablets.

We work with you

Working with our partners, we've created integrations to ensure that PaperCut MF and Cilantro come together as a total payment and information ecosystem for library environments.

We've had our development team integrate PaperCut MF with specific Library Management Systems such as Spydus, allowing end users to interact with every facet of their library's print and copy facilities from a single account that keeps accurate and comprehensive records for the benefit of library administration.

Our dev team is happy to work alongside partners to ensure that any Library Management System can be brought into this responsive and streamlined information ecosystem, allowing any library to take full advantage of PaperCut's power.

Products Used

PaperCut MF

PaperCut's flagship print management software offers the flexibility to meet the challenges of library environments. Take advantage of detailed user controls, reporting, intuitive print deployment, and much more.

PaperCut MobilityPrint

Take advantage of PaperCut Mobility Print, a cutting-edge, cross-platform cloud print solution that empowers BYOD printing, letting users print from their own smartphones, tablets and more.

cilantro

Taco's in-house connector, Cilantro, is the secret ingredient that brings everything together. Use Cilantro to integrate PaperCut MF with your Library Management System, payment processes, and PC reservations.

Cartadis

A range of kiosks and terminals that can form the perfect payment and account reload stations for libraries. Functionality can also include on-demand guest creation and pay-per-use services.

MyPC

Manage PC resources efficiently, whether it's for a quick, impromptu booking or a well-planned schedule. With MyPC + PaperCut MF, users can securely access PCs and release print jobs from any accessible printer.

Third-Party Connectivity Benefits

Libraries work better when systems know how to talk to one another. At Taco, our driving vision is creating truly connected environments. By integrating disparate systems, we give libraries the ability to save time and control costs, boosting efficiency for users and administrators simultaneously. PaperCut MF monitors print, copy, and scan usage allowing for cost recovery and an easy user experience.

PaperCut Mobility makes printing from BYOD devices simple, and adding Cilantro allows transactional and user information to be synchronised with Library Management Systems. This integration provides automatic account creation so users are free to print and copy immediately with charges applied. Cilantro allows users to easily top up their accounts whenever needed, without needing the help of staff, and adding MyPC allows PC reservations and room bookings to be fully integrated.
