

Accounting in Small to Medium Businesses

Print and scan with ease and link invoice information to accounting software for accurate financial tracking

Accurate Accounting

Small businesses deal with large volumes of orders and invoices on a daily basis. Inputting all of these invoices is a huge expense in both time and money, but without these costs on record it's impossible to get a full understanding of their weekly earnings. Implementing an EzeScan solution means invoice information is automatically captured and loaded into the accounting software, such as Xero or MYOB. These invoices are then put against sales numbers to display weekly earnings figures, giving a clear and accurate picture of the business' net profit position.

Tracking and Cost Saving

PaperCut MF allows business owners to view and track printing costs which provides actionable insights such as enforcing print policies like mandatory duplex printing and implementing secure print release to minimise wasted prints. Having an EzeScan connectivity solution means invoice information can be intelligently captured to automatically create invoices directly in the accounting software. This means that an employee is no longer required to input all the incoming invoices, saving a full time salary for a business which can be invested in other areas

Increase Employee Productivity

By streamlining business processes, this increases staff productivity and also reduces the workload on IT resources within the business. This can be through the use of PaperCut's Print Deploy, PaperCut Mobility Print and Find-me-printing. Employees can print from home and release print jobs once at the office with Secure Print Release. Additionally by automatically capturing essential invoice details, either digitally or scanning in hard copies, this streamlines the accounts payable process. With EzeScan, most invoices will require minimal or no operator intervention, increasing productivity and giving business owners up-to-date visibility of their cash flow.

We work with you...

Working in direct consultation with our reseller partners, we've created bespoke integrations to ensure that PaperCut MF and EzeScan can maximise the benefits to an SMB environment.

EzeScan accurately captures invoice data and sends it to Accounting Systems like Xero and MYOB, streamlining SMB workflows within one centralised database and maximising productivity whilst providing a clear overview of business progression.

Products Used

PaperCut's flagship print management software, PaperCut MF, is designed to suit your unique printing environment. Features include integrated scanning, detailed user controls, reporting, intuitive print deployment, and so much more.

Take advantage of PaperCut Mobility Print, a cutting-edge cloud print solution that empowers users to print from their own devices.

A powerful document digitisation solution, EzeScan allows you to scan large batches of documents with multiple forms of character recognition including OCR, OMR, and BCR, delivering impressive business productivity gains.

Third-Party Connectivity Benefits

SMBs work more efficiently when systems are accurate and up to date. At Taco, our driving vision is creating truly connected environments. By integrating disparate systems, we give SMBs the ability to process large batches of documents to keep their accounts updated and showing an accurate overview of their business. PaperCut and EzeScan seamlessly captures invoice information and sends it directly to the accounting software. PaperCut Mobility Print makes printing from BYO devices simple and easy for all employees.
