⏱ MyPC

COMPUTER BOOKING MADE EASY

Comprehensive Management

MyPC is the ultimate solution for computer booking and access management, ensuring an efficient and organised environment. It is widely used in education and public libraries, providing librarians and IT managers with complete control over bookings and user sessions,

Fair Usage and Efficiency

The unique self-service booking system of MyPC optimises and promotes fair usage while saving valuable staff time. This innovative approach not only enhances the overall user experience but also ensures that resources are used effectively and equitably.

Innovation and Integration

MyPC is continuously enhancing the solution, such as the Preparation Time feature which ensures computers are cleaned and ready for use. With MyPC integrations, users can access home computer resources, supporting remote working needs.

MyPC

SIMPLICITY

MyPC is easy for everyone to use; with its intuitive user interface and self service booking you require no technical skills to be in full control. All booking, administration and reporting is available anywhere, all from a single web browser.
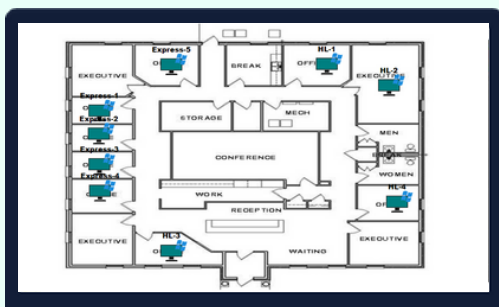

BOOKING METHODS

As well as walk-up usage, MyPC offers queued, advanced and staff bookings. For tutors and staff there is the additional option of flexible block and recurring bookings. There is also a quick booking feature that lets users schedule a session with just two clicks!

REPORTING

MyPC offers detailed reports on computer usage, bookings, no-shows, faulty devices, and banned users. Reports, including Unique Users, can be scheduled for email delivery and exported in Excel, PDF, and CSV formats.

MyPC MAPS MODULE

MyPC Maps is a web based add-on that integrates with MyPC to display floor plans. It shows PC availability with colour coded status and supports multiple scrolling maps to depict different sites.
