

Coworking

Easy management of members and charges

Track and Charge Usage

Coworking spaces need to manage a myriad of charges for office facility usage for both organisations and members. PaperCut and Cilantro simplify the capture of print related costs for administrators, automating member account synchronisation and the uploading of member charges. All information integrates together to maintain the coworking management system as the single source of truth.

BYO Device

Coworking spaces must be prepared to cater to the various hardware and software used by the members they house. PaperCut Mobility Print for PaperCut MF and PaperCut Hive has allowed print set up to become self-serve, enabling members to print from BYOD or mobile devices regardless of the platform - including MacOS, ChromeOS, Android and iOS. This frees up IT and administrator resources, allowing them to focus on more productive tasks.

Note: iPadOS is currently not supported for PaperCut Hive.

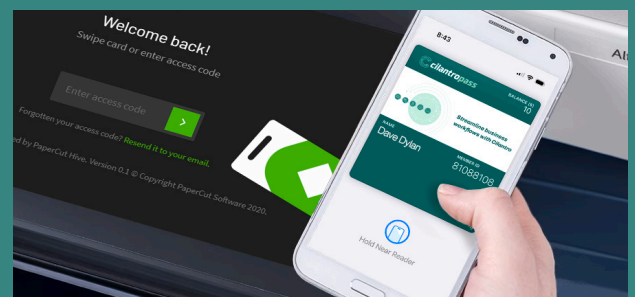

Document Security

Maintaining data security in a shared space is paramount. Our solution includes encryption, tracking and secure print release. This provides peace of mind and visibility of the member's document journey. Secure print release requires members to authenticate, ensuring sensitive information isn't left unattended at the printer. Authentication could be digitally by phone or watch, providing a seamless user experience.

We work with you...

Working with our partners, we've created bespoke integrations to ensure that PaperCut can maximise its benefits in a Coworking space.

For those wanting to use digital authentication, Cilantro Pass allows users to store their credentials in their Apple or Google wallet for convenient secure access to the print fleet. This offers easy secure printing, copying and scanning for all members in the coworking space.

Products Used

PaperCut's flagship print management software, PaperCut MF, is designed to suit the unique coworking print environment. Take advantage of reporting, intuitive print deployment, easy, secure, and waste-free printing and so much more.

PaperCut's cloud native print management software, PaperCut Hive, brings powerfully simple cloud print management to coworking spaces that need a secure and flexible printing solution.

PaperCut Mobility Print for PaperCut MF is a cutting-edge cloud print solution that empowers members to print from BYOD devices, providing flexibility to users in a coworking environment, at client locations as well as working from home.

Taco's in-house connector, Cilantro, is the secret ingredient that brings everything together. Use Cilantro to integrate PaperCut MF and PaperCut Hive with the Coworking Management System.

Use Cilantro Pass to store credentials in the member's Apple or Google wallet for easy and secure digital authentication at the printers in the shared space.

Third-Party Connectivity Benefits

Our driving vision is creating truly connected solutions and with Cilantro and PaperCut products, administrators have peace of mind knowing that the management system is the single source of truth. Print related charges including copying, printing and scanning are tracked and members are effectively managed whilst providing a seamless user experience.

PaperCut MF and Cilantro can integrate with OfficeRnD, Essensys Operate and Cobot management systems and Cilantro also has an Add-on for PaperCut Hive and OfficeRnD providing connected environments in shared spaces.
