Cartadis

## Connected equipment for payments and controlling print, copy and scan

Cartadis products are renowned for their toughness and durability, engineered with the expertise that comes from 40 years experience. The products offer functionality and simplicity to users – from managing PaperCut accounts, vending and also providing solutions for non-networked environments.

Why Cartadis

The Cartadis range of products are robust and durable, providing solutions that are the ideal fit for self-service environments, such as public libraries and universities. They are designed to withstand everyday use in these fast paced environments. All of the Cartadis solutions have been configured to be secure and efficient, protecting users data and providing a simple, intuitive user experience. Customers can also integrate PaperCut and Cilantro for added functionality.

PRODUCTS

DRC10 & CR10

Self-service accounting kiosk to add credit to PaperCut MF accounts via cash or card. These robust kiosks empower users to reload and create* their own PaperCut accounts, not only improving their experience, it also drives productivity in schools, public or university libraries as administrators are freed to perform other tasks.

DRC10 only

cBot

Designed for public work spaces, this kiosk allows users to print on a pay-per-use basis or add credit to an existing account. The kiosk can be configured to accept everything from cash payments to debit and credit cards, providing the necessary flexibility for users whilst still safeguarding security and business profitability.

cPad

The cPad is a versatile and intuitive touchscreen control terminal, to enhance copying and printing processes. Offering streamlined functionality to match its intuitive and ergonomic aesthetic, the cPad allows users to access their accounts with a simple passcode or ID card. The vibrant display allows one or more documents to be selected from the queue to print with the touch of a finger.

CM4000

Designed to emphasise simplicity and versatility above all else, this stand-alone control unit allows users to pay for copies using coins of multiple denominations without any need for a linked account or magnetic card. No network connection is required, and the unit is designed for use with virtually all commercial photocopiers. It can even provide simple statistical information about your users.

PRODUCTS

TCM3

Designed as a hassle-free solution for a diverse range of applications, the Tcm3 is a compact USB reader for a wide range of contactless and proximity cards. Users can even tap their Android smartphone to identify themselves. This convenient reader is a natural choice for user identification in applications ranging from printing and copying to customer loyalty programs.

TC4N

Emphasising simplicity, this card reader allows users to charge their copies to disposable or reusable cards. Ideal for environments where self-service is a must, the TC4N card reader is the ideal fit for educational institutions, large businesses, and legal firms. Employing either disposable or reloadable cards, the versatile reader puts copy management in the hands of each individual user while allowing the organisation to bolster their profitability and record-keeping reliability.

CMDB

The CMDB is designed to be the physical link connecting a vending machine to PaperCut user accounts. It is ideal for any campus or business environment that allows users to pay for items, dispensed across various types of vending machines, using their PaperCut account.
