

Streamline Legal Management

Seamless document management and cost recovery
in one simple and secure solution

Improve Cash Flow

Legal firms need to securely and accurately capture and charge for all print activities. This integration features multiple ways to manage invoices and automates the process of allocating expenses against client matters. As it's connected with EvolveGo, it's easy and efficient to invoice clients, improving the firm's cash flow.

Streamline Workflow

With the volume of paperwork that is generated, the document workflow needs to be efficient and secure. The Cilantro integration with PaperCut MF allows for documents to be scanned from the MFD directly to the client matter. PaperCut MF's inbuilt OCR creates intelligent text-searchable documents for easy navigation and retrieval of large files.

Client & Matter Creation

Cilantro synchronises new Matter codes created in EvolveGo into PaperCut MF. This allows for easy matter allocation, when printing, copying or scanning, creating a seamless and intuitive user experience. This also streamlines productivity and ensures quality standards are applied as it removes the data security risks for scan to email workflows.

EvolveGo from PracticeEvolve is a cloud-based practice management solution designed for the mid-tier market, combining practice management, legal accounting and document automation to meet the legal sector's unique needs.

Taco's in-house connector, Cilantro, provides the key link to integrate PaperCut MF with EvolveGo. This connectivity tool, empowers productivity for legal firms whilst streamlining user workflows.

PaperCut MF is designed with security at its forefront whilst delivering a user-friendly print environment that improves both client data integrity and a firm's productivity.

Let Cilantro combine the power of PaperCut MF and EvolveGo to maximise a firm's productivity and workflow efficiency

Key integration actions with *EvolveGo* |  PracticeEvolve™

- Client Matter Sync to PaperCut MF from EvolveGo
- Scanning directly to a matter in EvolveGo
