## Cilantro

### Streamline Business Workflows

**Cilantro** has been developed in house to connect PaperCut MF and Hive to third-party accounting, coworking, legal billing, and account reloading products. It's the secret ingredient that brings everything together.

Let the power of **Cilantro** transform businesses to enhance productivity, accuracy and allow for efficiency gains throughout organisations.

### Why Cilantro?

Cilantro allows businesses to extend the capabilities of PaperCut MF and Hive to suit their working environment, from corporate settings, coworking spaces, law firms, libraries and universities. Taco Technologies in-house development team can even build bespoke integrations to fit an organisations unique requirements.

## Simplicity

Cilantro is easy to use and easy to install. For many installations, it's simply let the wizard show the way. Coupled with the detailed Solution guides, this empowers many partners to perform the installation on behalf of the client. With administrative components of Cilantro utilising the Microsoft Azure cloud service, the Cilantro web portal is remotely available, allowing ease of access from anywhere at any time.

## Security

Cilantro is a scalable and secure integration tool. It gives businesses the power to securely and seamlessly transfer data between disparate systems, whilst maintaining a single source of truth. The Cilantro platform is also an effective payment solution allowing users to securely pay for print, copy and scan, online or in person. All payment details are safeguarded, giving users peace of mind.

## Productivity

Cilantro streamlines business processes for accuracy and efficiency gains. It reduces manual and double handling of data. Cilantro provides a scalable workflow solution, adding functionality and extending the ability of the solutions originally scoped design. It creates a cohesive system, freeing up users to concentrate on meaningful tasks increasing employee satisfaction.

## Legal

Cilantro integrates PaperCut MF with Practice Management Systems including LEAP, Affinity, FilePro, Actionstep, Open Practice, and Smokeball, streamlining legal workflows within one centralised database, maximising productivity whilst ensuring that all print/copy/scan/fax charges can be accurately tracked and disbursed against the correct client/matter number.

## Coworking

Cilantro integrates PaperCut MF with popular Coworking Management Systems like OfficeRnD and Cobot, meaning member print charges can be tracked and stored in one place under the member's record in the Management System. Printing and copy costs are tracked via PaperCut MF and uploaded into the coworking management system.

## Payments

Leading online payment gateways such as BPOINT, SecurePay, Nelnet and WindCave, integrate with Cilantro. The secure integration empowers users to quickly and simply top up their PaperCut balance in real time, allowing them to pay for print, copy and scan. The integrations have been developed with security as a number one priority, meaning users can be assured that their details are kept secure.

## Accounting Systems

Cilantro integrates PaperCut with leading accounting systems such as Xero. Users can integrate with PaperCut MF to automate and streamline the invoicing process. This integration allows users to create invoices in the accounting system that contain all print, scan, copy, and fax transactions from PaperCut. Cilantro can also integrate with EzeScan, giving businesses the power to link invoice information to accounting software for accurate financial tracking.
