EzeScan

The seamless solution creating structure for businesses

EzeScan is an innovative Australian product to streamline digital document filing. It is a powerful digitisation solution allowing businesses to increase efficiency with accurate results whilst delivering impressive productivity gains. Simply scan and import and then index documents all using **EzeScan's** unique powerful indexing interface.

Why EzeScan?

EzeScan gives businesses the power to digitally transform through intelligent business processes. Businesses can accelerate document delivery, minimise manual handling, and capture critical information, whilst adhering to governance and regulatory standards. Filing standards are intelligently applied, meaning staff can easily and efficiently find documents, increasing productivity. Let the power of EzeScan eliminate document backlogs, addressing risk and compliance to drive digital transformation within businesses.

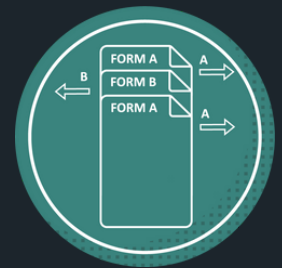

WebApps Essentials

WebApps Essentials allows businesses to increase productivity and efficiency, through streamlining document filing and implementing consistent naming conventions. The solution makes it easy to file and retrieve documents, reducing admin time and allowing employees to focus on what matters.

WebApps Extend

WebApps Extend gives greater flexibility including all of the features of WebApps Essentials, plus many more! The solution reduces manual entry and filing, increases staff productivity and delivers an easy intuitive workflow. It is ideal for processing structured, and semi structured files, using metadata within the document to select workflows, create file names and file paths. WebApps Extend unlocks the potential for document filing automation.

WebApps Excel

WebApps Excel leverages a businesses existing investment in file management systems by creating a streamlined pathway into document management and cloud services. It not only predictably names the files, but also links the metadata to the document allowing easier searching and retrieval of documents.
