

TC4N Magnetic Card Terminal

An innovative copy management solution for everything from universities to corporate firms, the TC4N Magnetic Card Terminal offers broad compatibility and unparalleled ease of use.

Emphasising simplicity, this card reader allows users to charge their copies to disposable or reusable cards. Ideal for environments where self-service is a must, the TC4N card reader is a great fit for educational institutions, large businesses, and legal firms.

Employing either disposable or reloadable cards, the versatile reader puts print management in the hands of each individual user while allowing the organisation to bolster their profitability and record-keeping reliability.

Disposable and Reusable Cards

User cards for the TC4N Reader are available in two forms – reusable and disposable. Each type is the size of a credit card and can be dispensed from a DRCg reloader/dispenser. The cards employ high-coercivity magnetic strips. Users are able to add value to their reusable cards at a reloading terminal while disposable cards may only be loaded a single time.

Features & Benefits

- Broad compatibility – The TC4N works with 99% of brands and models on the market.
- Durable and dependable system. Designed for environments where heavy usage is expected.
- Supports up to 10,000 accounts and 99 departments.
- Safeguard profits while empowering users.
- Ideal for education, corporate, and legal applications – plus many more.
- Supports free or paid accounts.

Applications

Schools and Universities

The need for high volumes of self-service copying in educational environments makes the TC4N Magnetic Card Terminal a natural fit. Students can purchase disposable or reusable cards from paired dispensers such as the DRCg, then self-manage their paid copying needs.

Copy Shops

Public copy shops can bolster their profits by limiting the amount of service required for customers to make copies by installing TC4N Card Readers.

Corporate and Legal

Larger firms and companies can manage their high-volume copying needs by installing TC4N Magnetic Card Readers, letting their employees use funds on a linked account to self-manage their copying.

Dispensers and Reloaders

Cartadis manufactures an automatic card dispenser and reloader for use with the TC4N Magnetic Card Reader. Boasting a versatile pedestal design, the DRCg unit allows users to acquire cards or reload reusable cards themselves without relying on any human service.

DRCg

Designed to work with the TC4N Magnetic Card Reader, the DRCg offers a user-friendly interface putting workers, students, and customers in total control of their copying accounts. The dispenser/reloader allows users to add funds to their reloadable cards. It also allows them to acquire new disposable or reloadable card.
