

cBot

Autonomous print & copy kiosk for self-service in any environment

Minimise the need for staff service while increasing the degree of control that users have with this autonomous kiosk. Designed for public work spaces such as libraries, universities, and internet cafes, this kiosk allows users to print on a pay-per-use basis or add credit to an existing account. The kiosk can be configured to accept everything from cash payments to debit and credit cards, providing the necessary flexibility for users whilst still safeguarding security and business profitability.

Features & Benefits

- Pay per use – no need for users to create an account.
- Ideal for libraries and other public work spaces.
- With a user account, users can print directly from their mobile, tablet or PC through an application or web interface.
- Provides change to users from a self-replenishing change module with overflow coins dropping into a secure lock box.
- Accepts credit & debit cards via the approved Nayax terminal.
- Add credit to existing account – this kiosk allows users to add credit to their existing student or user account.
- Huge range of handy features including door alarm, print management for unlimited users, and more.
- cBot works with the easy to use and manager Nayax, bank card terminal.
- Built with security in mind, the cBot comes as standard with a warning message for door opening and reporting of cash collection.
- The device is locked at the rear of the machine and is supplied with 2 keys. An additional key can be stored at a separate location for peace of mind.
- cBot terminals can be wrapped in a custom vinyl to match the client's brand and corporate identity.

How Does it Work?

The cBot allows users total freedom in choosing how they want to pay for their printing and copying needs. This autonomous unit accommodates coins, banknotes, credit cards, and debit cards and even use this unit to add credit to existing accounts from a variety of cost recovery systems. This versatility makes the kiosk a natural fit for environments ranging from universities to public spaces such as newsagencies, hostels, internet cafes and more!

When users create an account, they can take advantage of the cBot's mobile printing capabilities. This allows users to print directly from devices such as phones, tablets, and PCs by using an application or web interface.
