CMprint

Autonomous print & copy kiosk for self-service in any environment

Empower users to pay for prints, scans and copies with this simple to use self service payment kiosk. It is designed for environments such as libraries, universities, internet cafes, newsagencies and hotels, allowing users to print on a pay-per-use basis with cash or credit card. The user experience is simple and intuitive as there is no need to create an account or set up logins. The CMprint can be connected to all brands of devices providing the optimal solution for self service print and copy sales.

Features & Benefits

- Ideal for public work spaces including newsagencies, internet cafes and hotel lobbies.

- Controlled by an innovative 5" colour user touchscreen interface.
- Manages 4 copy formats (A4, A3, B&W and Colour) on both printers or compatible multifunction devices.
- USB port allows printing of PDF or image files from a USB, including file and page selection, document preview and scanning documents to the USB storage device.

- Pay per use – no need for users to create an account.
- Accepts credit & debit cards via the easy to use and approved Nayax bank card terminal.

- Supports up to 5 different coins.
- Supplied with a key allowing free copies.

- Administrator key allows the setting of prices and configuration.

- Reports can be printed or displayed on the screen which including cumulative turnover, number of copies and selling prices.

- Coin box is easily accessible by key from the right panel. A lock option is available for additional security in unattended areas.

How Does it Work?

USB Print - Select Print from the touch screen, insert your USB with PDF or image files. Select the file you wish to print, change printing parameters, preview the file on screen. You will see the cost to print the file, insert coins or select Bankcard Payment. The screen will display a QR code to download your receipt.

Scan to USB - Select Scan from the touch screen, insert your USB. Scan your documents on the MFD. You can preview your document on the CMprint screen. The documents will be saved to your USB once payment has been made by inserting coins or Bankcard Payment, a QR code will be displayed to download your receipt.

Complies with the General Data Protection Regulation (GDPR) and does not retain your data

Copy - Select Copy from the touch screen, insert coins or Bankcard Payment for the number of copies you wish to perform. The CMprint will then unlock the MFD for copying once enough credit has been inserted. The CMprint screen will display a QR code to download your receipt. Copy your documents on MFD until credit has been used.
