ELATEC

Universal RFID readers for secure printing applications

Print security is an essential component of information management and cost control initiatives. Radiofrequency identification (RFID), NFC and bluetooth low energy are flexible and easy solutions for secure printing. With these technologies, it identifies exactly who is printing what and when – and can make sure the right person is picking up the right documents. **ELATEC** is the ideal secure printing partner and works with all major print manufacturers and PaperCut.

Why ELATEC?

ELATECS' powerful combination of products, software and service is unmatched in the industry. ELATEC provides simple, secure and versatile solutions for secure printing applications, along with the knowledge to support them. Help solve business challenges with solutions that are secure, powerful, reliable, flexible and future proof.

QRDOC.IO

v1.0

TWN4 MultiTech Reader

These all-in-one programmable RFID readers are connected by USB and come as standard with desktop housing. These allow users to read and write to almost any 125 kHz and 13.56 MHz tags and/or labels and supports all major transponders.

Also available for Bluetooth Low Energy (BLE).

TWN4 USB Front Reader

Flexible, convenient and cost effective reader which can be easily connected to an external USB port. This integrates RFID,NFC and bluetooth capabilities into a compact but powerful reader.

TWN4 Upgrade Card

Additional technologies can be added quickly and without the need for additional tools or special know-how. For example technologies can be extended by adding option I to a TWN4 product with the upgrade Card.

TCPConv

Fast release terminal delivering card authentication to any network printer or MFD with no configuration necessary to the device.

ELATEC
RFID Systems

TCP3 Authentication / Release Station

Fast release terminal with built-in ethernet switch eliminating the need for an additional network connection

TechTracer Lite & TechTracer Kit TWN4 MultiTech

The TechTracer Lite is the must-have compact tool to determine the most common RFID technologies, also including NFC and bluetooth low energy technology.
The TechTracer Kit includes the Lite contents and also twelve transponders, desktop reader with mounting options and USB memory stick with SDK.

TWN4 Config Programmer Kit

Enables the user to change the configuration of a card reader wirelessly in a matter of seconds using a configuration card.

Snap-In Holder

The snap-in holder is the simplest accessory for attaching an RFID reader to a flat surface.
