TACO

Streamline Legal Management

Seamless document management and cost recovery in one solution

Automate Cost Recovery

Automate the process of tracking print, copy and scan costs against corresponding client matters for reimbursement. The Cilantro connector integrates with PaperCut MF and PaperCut Mobility print and a range of PMS software. This allows all fees and charges to be securely and accurately captured against client matters, removing the need for any manual record keeping or merging of disparate systems.

Streamlined Workflow

With the volume of paperwork that is generated with client matters, the document workflow process needs to be easy. Paper documents are scanned from the MFD and routed to the correct client matter. PaperCut MF's inbuilt OCR will even make the document a text searchable PDF for easy document retrieval.

Client & Matter Creation

Anytime a new Client or Matter code is created within the PMS, Cilantro will synchronise with PaperCut MF to create an account for immediate use. This reduces double handling and ensures no errors. The matter code is also added as a pin in PaperCut MF. This makes it easy to on board new employees as the printer or copier screen provides a step by step guide to the document workflow process. With Client and Matter codes showing on the screen, this makes it easy for users to allocate to the correct matter for intuitive user experience.

We work with you...

Working in direct consultation with our reseller partners, we've created bespoke integrations to ensure that PaperCut MF and Cilantro can maximise the benefits to a legal environment. Our development team has integrated PaperCut MF with Practice Management Systems like LEAP, Affinity, FilePro, Actionstep, Open Practice, Infinitylaw, Smokeball , Practice Evolve and EvolveGo, streamlining a law firm's workflows within one centralised database, maximising productivity whilst ensuring that all fees and charges can be accurately tracked and accounted for.

Our dev team is happy to work alongside resellers to ensure that any Practice Management System can be brought into this responsive and streamlined information ecosystem, allowing any law firm to take full advantage of PaperCut's power.

Products Used

PaperCut MF

PaperCut's flagship print management software, PaperCut MF, is designed to suit your unique printing environment. Take advantage of detailed user controls, reporting, intuitive print deployment, and so much more.

PaperCut MobilityPrint

PaperCut Mobility Print is a cutting-edge cloud print solution that empowers users to print from their own devices (BYOD) providing flexibility to users both in the office, at client locations as well as working from home.

cilantro

Taco's in-house connector, Cilantro, is the secret ingredient that brings everything together. Use Cilantro to integrate PaperCut MF with your Practice Management System.

Third-Party Connectivity Benefits

Law firms work better when systems are responsive and secure. At Taco, our driving vision is creating truly connected environments. By integrating systems, the law firm takes control of disbursements, costs and document management all from one system.

PaperCut Mobility Print makes printing from BYOD devices simple, and adding Cilantro allows this information to be synchronised with Practice Management Systems for automated record keeping. The Cilantro integration simplifies the workflow process for all employees.
