

CMprint

Autonomous print, copy and scan kiosk for self-service in any environment

Designed for public spaces like libraries, universities, internet cafés, newsagencies, and hotels, CMprint offers a simple, pay-per-use solution for printing, copying and scanning. Users can pay with cash or credit card - no need to create accounts or log in. Compatible with all major printer brands, the CMprint is the ideal hassle-free option for self-service print, copy & scan access.

Features & Benefits

- ▶ Ideal for public workspaces including libraries, newsagencies, internet cafes, and hotel lobbies.
- ▶ Controlled by an intuitive 5" colour touchscreen interface.
- ▶ Supports a wide range of file types: PDF, Word (DOCX), PowerPoint (PPTX), JPEG, PNG, and GIF.
- ▶ Manages standard paper sizes (A4, A3) in both Black & White and Colour on compatible printers and MFDs.
- ▶ Operates as a standalone, pay-per-use system, requiring no user accounts or additional management software.
- ▶ The **Cartadis'nPay cashless terminal** option unlocks the full **PrinterKiosk** feature set, which includes:
 - Competitive cashless transaction pricing.
 - The ability for users to email print jobs and release them securely with a PrintCode.
 - Access to an online portal for administrators to view reports.
 - An option to advertise your location on the **PrinterKiosk** public website.
- ▶ Scan documents and send them directly to a user's smartphone via a secure QR code.
- ▶ Includes a "Scan-to-Copy" function to enable copying on devices where the MFD's copy feature is not directly controlled by the CMprint
- ▶ Allows users to print documents from a USB drive or scan documents directly onto one.
- ▶ A **Nayax cashless terminal** is also available as a reliable payment alternative (this option does not include the **PrinterKiosk** functions).
- ▶ Generate and view detailed reports on-screen or print them, including total turnover, transaction counts, and selling prices.
- ▶ A secure administrator key provides access to configure settings, set prices, and issue free copies.
- ▶ Supports at least 5 different coin types
- ▶ The coin box is easily accessible from the side of the CMprint. An optional anti-theft lock is available for added security for unattended sites.

Configuration with Options

- ▶ **3 Standard Base Units Available**
 - CMPrint - for modern Multifunction Printers (MFPs)
 - CMPrint - for MFPs that require a Serial interface
 - CMPrint - for single-function Printers
- ▶ **Payment Options**
 - Coin mechanism (accepts at least 5 different coins)
 - **Cartadis'nPay** Cashless Terminal (enables all **PrinterKiosk** functions)
 - Nayax Cashless Terminal (provides cashless payments without **PrinterKiosk** functions)

► Accessories

- Pedestal stand for freestanding installation
- Anti-theft box kit (optional)

How it works

PrinterKiosk Printing - Users email their documents to the kiosk's unique address. A secure PrintCode is sent back to their email. They enter this code on the CMprint's screen to view and pay for their job, after which the documents are printed.

USB Print - Insert a USB drive, select 'Print' on the touchscreen, and choose your file. You can preview the document and see the cost. After paying with coins or a card, your documents will be printed.

Scan to Smartphone - Users can scan their documents and preview them on the screen. After payment, a QR code appears. Scanning this code with a smartphone instantly downloads the document.

Scan to USB - Insert a USB drive and select 'Scan'. After the document is scanned and previewed on the screen, payment is made, and the file is saved directly to the USB drive.

Copy - Select 'Copy' and pre-pay for the number of copies you need. The CMprint will unlock the connected MFD's copy function, allowing you to make copies until the credit is used.

Scan to Copy - For devices where the copy function is not directly controlled by the CMprint. This feature first scans your document, allows you to preview the scan on the 5" screen to ensure it's clear. After payment, the system prints the scanned image, creating a copy.

Electronic Receipt - After any transaction, customers have the option to download a digital receipt to their smartphone by scanning a QR code on the screen.

Privacy - The CMprint is fully compliant with the General Data Protection Regulation (GDPR). To protect user privacy, it does not retain any documents or data after the transaction is complete.
